

"POSSIBILITIES AS FAR AS THE GRASS GROWS"

Welcome to The Harvester, a periodic newsletter of Lawson Turf. Here at Lawson Turf it is our pleasure to keep you updated as we expand our farm and strive to become your year-round supplier of high-quality sod.

"Spring is In the Air"

With the onset of Spring often times comes poor-quality sod. Old man winter's harsh freezing nights can make sod very thin and brittle, and in most cases, impossible to handle. That's why it is imperative to have a good supply of mature grass that you can harvest in the early spring. If you need that good mature grass, call us! We have excellent supply of Centipede, Tifway 419 and Zenith® Zoysia that is good mature grass that we are currently harvesting in mini-rolls and shipping. Yes, you don't find many sod companies shipping mini-rolls this time of year, but we have that "good ole mature grass" that is rolling great! So give us a call and try a load of our high quality Centipede (Netted), 419 Bermuda or Zenith® Zoysia harvested in mini-rolls.

Available in June 2007

We will have a good supply
of Sapphire® St. Augustine for our coastal customers.
Sapphire® is the only high performance fine-bladed St. Augustine
in the world!

This is a special turf! You need to try this one!

**Coming Summer 2007**

We are very excited to introduce 2 new extremely drought tolerant Zoysia varieties.
If you have water issues, don't pass up these outstanding performers!!

JaMur® Zoysia and Zeon® Zoysia

We would like you to consider our firm on your next sod order!
You can rest assured, we will strive to earn your business.
